FOR IMMEDIATE RELEASE

BON'S KANGAROO COMBO SCREED NOW MANUFACTURED WITH A BUILT-IN LEVEL VIAL

(GIBSONIA, PA, USA) – Bon's improved Kangaroo Combo Screed is now manufactured with a bubble level built into the handle to provide time-saving, precise preparation and finish work. The lightweight aluminum design and built-in handle make it easy to move heavy loads. The added built in level function is a convenient time saver. This Kangaroo Combo Screed is the best manual screed for multiple trade applications: concrete, hardscape and asphalt work.

The combo tool features a sharp edge that provides a clean screed, and a rounded edge that provides a good start to floating off or closing out your concrete. The built-in ribbed handle provides excellent grip and better leverage to pull large amounts of material. The bottom edge of the screed provides an asphalt checker system, while the level bubble makes an even more precise measure to set your base or check your work.

This durable tool is made of a lightweight, yet high tensile aluminum that resists bending and is durable for years of service. It is fully reversible making it even longer lasting. Bon's Kangaroo Combo Screed is available in five lengths from 4' to 12'.
