BON BLUE IS THE NEW GREEN

The Switch is on to Bon's new Blue Foam Float

(GIBSONIA, PA, USA) – Bon's Blue Foam Float will have the competition seeing green with envy; and have contractors seeing green with saved dollar bills. But that's the only "green" they'll be seeing because once the high quality and better value of the Bon Blue Foam Float is experienced there will be no going back to green foam floats again.

The unique and durable design features of the Bon Blue Puma Float provide perfect texture and long life. It is manufactured with a specially formulated foam that will last through many applications. It has a heavy gauge aluminum backing that is perforated so water can flow through for a thorough cleaning. A complete clean-up means the foam lasts longer. Another "better value" feature is the non-splinter plastic handle which will not warp even as it is exposed to moisture.

The specially formulated blue poly sponge provides a perfectly even texture to stucco and is popular for smooth finish applications such as swimming pools. It very quickly brings sand aggregates to the surface. The handle is contoured and textured for a comfortable, no-slip grip.

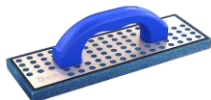

About Bon Tool Co:
