

True Color™ Concrete Hardener

BonWay™ True Color Hardener is a surface applied dry shake color and surface hardener that produces a hard, durable, abrasion resistant surface that is formulated to create a uniform consistent color.

Coverage rates vary by color and use. Generally 60 lbs. per 100 sq. ft. is used. Lighter colors may require as much as 100 lbs. per 100 sq. ft.

Note: Colors shown approximate the final color, after a coat of sealer has been applied. Many factors outside of our control affect the final outcome of the project. Please consider mix ratio, hydration, cement, aggregate, cure time and other factors upon review of the final project. It is recommended to perform a test pour.
