## **INSTRUCTIONS** #14-885 Canopy Top for Scaffold End Frames

The Canopy Tap is used along the top of a scaffold set-up to hold weather protection material in place. It fits on top of any 5' frame. Brackets to hold  $2' \times 4'$  wood have been welded to the outside leg. Weather protection clips can also be used.

## **NOTE:**

Any time weather protection is used, additional scaffold tying is required due to wind loads.
