## **BON EXPANDS ITS LINE OF STEEL CITY™ FINISH TROWELS**

### *New Trowels Made of Ultra Flex Blue Steel Blade Material*

(GIBSONIA, PA, USA) – Bon's popular line of Steel City Trowels™ has been expanded to include 22 new trowels made of Ultra Flex Blue Steel. This line of finishing trowels for concrete and plaster work includes trowels made of 5 premium blade materials: Carbon Steel, Golden Stainless Steel, Razor Stainless Steel; Blue Steel and now also available in Ultra Flex Blue Steel.

The new Ultra Flex Blue Steel Trowels are made of a very thin material for superior flexibility. Popular applications for this trowel with a .019" blade include plaster work, particularly for the 12- and 14-inch length trowels, and concrete overlay and self-leveling, micro topping applications with the longer 16- to 20-inch size trowels.

Steel City Trowels™ are produced to the highest quality standards, setting a superior performance standard in the marketplace. The trowels feature a lightweight and durable aluminum shank and an industry exclusive rivet system in which the shank is attached to the blade utilizing two copper rivets. This provides maximum strength and durability. All blades are precision ground.

Over 200 Steel City Trowels are in production at Bon's plant in a suburb of the "Steel City" of Pittsburgh. Options include square end or round end, short or long shank. The wide variety of available styles and sizes are equipped with choice of Bon's patented Comfort Wave or Camel Back Wood handle. Both handle options are ergonomically designed for comfortable, all day use.
