FOR IMMEDIATE RELEASE

## **BON LINOLEUM ROLLERS AND ROLLER ACCESSORIES MAKE INSTALLATION EASY**

(GIBSONIA, PA, USA) – Bon Tool Co. is the manufacturer of the highest-quality, contractor-tested linoleum rollers and roller accessories for the jobsite. Our rollers have all the features professional contractors require for easy and error free professional installation.

The rollers are available in 75-pound and 100-pound models, both with three independently-floating roller sections. The smooth, rounded edges and recessed ends of the roller sections helps installers to protect walls and new flooring materials. Each of its three roller sections floats independently on the axle to help compensate for inconsistencies below the flooring. A 50-lb weight accessory can be added to the roller for even more rolling power.

Most contractors prefer using the Bon Rollers with the optional Roller Transporter which protects the roller wheels from damage when not in use and relieves back strain for contractors who would otherwise carry the equipment on the jobsite. The transporter attaches to the linoleum roller and when engaged lifts the roller sections of the tool off the ground so the equipment can easily and safely be moved. The Roller Transporter remains on the roller but easily retracts when the roller is being used. The Bon Roller Transporter features a positive wheel locking system for safe transport on stairs and 360-degree motion for rolling in both directions.

Bon Linoleum Rollers, Roller Weight and Roller Transporter are made for a lifetime or trouble-free service. The Rollers are made from solid steel with a painted yoke and handle to prevent rusting. The contractor-grade rollers are built for professional use and are popular as well for rental outlets.
