FOR IMMEDIATE RELEASE

BON TOOL CO. STITCHING SPRAY SOK™ GEAR AT PENNSYLVANIA HEADQUARTERS

(May 5, 2017, GIBSONIA, PA) -- Production of SPRAY-SOK™ protective head coverings has continued uninterrupted following Bon’s acquisition of the operating assets of the California based company last summer. Manufacturing is now in full swing at Bon’s Pennsylvania headquarters, where personnel is busy stitching to meet the demand for SPRAY SOK™ products.

The hood-type safety gear is popular for multiple professional construction, landscape and DIY applications to protect the head and face from flying debris, dust, paint and other materials. The flexible fit of SPRAY-SOK™ head gear can be positioned to leave most of the face exposed, or to cover all except the eyes with no restriction of peripheral vision.

The original Spray-Sok™ and longer chest length Hood-Sok™ are made of an all-cotton, open mesh fabric that absorbs moisture and allows skin to breathe for maximum cooling and comfort. Hood-Soks™ made of a flame resistant NOMEX fabric and permanently dyed S.W.A.T.fabrics are also available.

Bon Tool Co. is the exclusive manufacturer rights of SPRAY-SOK™ items. The manufacture of the SPRAY-SOK™ products has continued while maintaining the original specifications, trusted quality and established SPRAY-SOK™ brand name.
