BON INTRODUCES NEW CONTINUOUS MASONRY GUIDE SYSTEM

There is no Height Limitation for this Alignment Guide

(GIBSONIA, PA, USA) – From the company that was founded on the strength of its patented Masonry Guide, comes a new Continuous Masonry Guide System. There is no height limitation for use of the new Masonry Guide, making it ideal for block work in high spaces such as elevator shaft construction, or multi-story building work.

Just as with Bon's other Masonry Guide options, this alignment guide eliminates the need to "build a lead" before beginning to masonry project. Bon's Masonry Guides are available in fixed heights with permanently marked modular and brick scales or unmarked; and new for 2021 Bon is offering the Continuous Guide with utilizes Extender Inserts to connect poles for more height.

The 2-inch square by 8-1/2 foot Continuous System Pole and the Extender Insert designed for use with the new poles are both pre-drilled to accept snap pins which secure two poles and double the height of the guide. The new guides revolutionize masonry work, saving time and money on the jobsite.

The new Guide System is offered as a complete kit containing one 9' Continuous System Pole; a Free Standing Base Fitting; an Intermediate Fitting; and an Extender Insert with two Snap Pins. As well, all components are sold separately to allow best set up for the construction project.

Bon brings nearly 60 years of experience in tool design, manufacturing and marketing to the promotion of this new product. From the invention of the Masonry Guide over 60 years ago to the introduction of Bon's Keystone Forged Masonry Trowel, Bon remains committed to the development and improvement of tools for professional masons.
