BON INTRODUCES RHINOBOARD™ BY BON (21-369): SAFER, LIGHTER MORTAR BOARD BUILT FOR THE JOBSITE

(GIBSONIA, PA, USA) – Bon Tool Co., a leader in contractor-grade hand tools, is proud to announce the release of **RhinoBoard™ by Bon (Part 21-369)**, a durable, job-site optimized mortar board that raises the bar for safety, portability, and performance.

Built to meet the needs of the modern mason, the RhinoBoard™ by Bon features:

- **Sized for convenience** – A 24" × 24" platform, just 3/4" thick and weighing only 5 lbs, makes it easy to carry and quick to set up.
- **Built-in handle** – Ergonomically positioned recess allows easy one-hand transport between scaffold and wall.
- **UV-resistant poly construction** – Durable enough to withstand jobsite weather, resisting fading and cracking over time.
- **Custom-cut bottom edges** – Intended to fit securely onto mortar board stands, ensuring the board stays firmly in place during work.
- **Rounded corners and trimmed edges** – Eliminates sharp corners, reducing bump risks when navigating along scaffold, and keeping your mortar on your board.

“We designed the RhinoBoard™ with the mason in mind—lightweight, durable, and safer by design,” said Tom Harford, Engineering Manager at Bon Tool Co. “By combining safety features and practical utility in a compact, easy-to-carry board, we’re making on-site life easier and more efficient.”

The RhinoBoard™ by Bon is now available through Bon Tool’s distribution network and online at www.bontool.com.

About Bon Tool Co.
