Bon Tool Co. Launches SURFACE1™ Through BonWay: Ready-to-Ship Colloidal Concrete Finishing Aid Built for Extended Workability And Stronger Surfaces

Gibsonia, PA [04/27/2026] Bon Tool Co., through its expanding BonWay Decorative Concrete division, is spotlighting one of its newest ready-to-ship innovations: [SURFACE1™ Concrete Finishing Aid \(32-519\)](#) — a professional-grade, colloidal finishing aid engineered to extend finishing time, improve surface integrity, and help contractors produce stronger, more durable concrete surfaces under demanding conditions. Bon lists SURFACE1 as a ready-to-use formula that extends finishing time during floating and troweling, improves durability without discoloration, and covers approximately 500–1000 sq. ft. per gallon.

Designed as a competitive alternative to leading finishing aids such as Day1®/D1-style products, SURFACE1™ uses **colloidal silica technology** — meaning ultra-fine silica particles suspended in liquid that penetrate the slab surface during finishing. Rather than simply adding surface moisture, colloidal technology helps increase cream, extend workable time, and support densification at the surface level without increasing the water-to-cement ratio.

Comparable products in this category emphasize reduced premature set risk, improved abrasion resistance, lower moisture vapor transmission, and stronger cured surfaces by becoming a permanent part of the slab rather than leaving a removable membrane.

What sets SURFACE1™ apart:

- **Ready to ship through BonWay**
- **No dilution required**
- **Extends floating and troweling window**
- **Helps reduce stress in heat, wind, or fast-drying conditions**
- **Supports surface strength and durability**
- **Improves finishing performance without adding excess water**

For contractors familiar with D1/Day1-style systems, SURFACE1™ offers the same category advantages—extended workability and improved finishing performance—while strengthening Bon Tool Co.’s growing in-house BonWay chemical lineup with immediate availability and integrated support through Bon’s national distribution network. For instructions and use see SURFACE1’s [Technical Bulletin](#).

“As concrete contractors continue demanding better surface performance without compromising slab integrity, SURFACE1™ represents BonWay’s commitment to practical innovation,” said James Beall. “It’s about giving finishers more control, more time, and a better final surface—while keeping product access simple and reliable.”

With BonWay’s continued expansion into decorative and chemical solutions, SURFACE1™ reinforces Bon Tool Co.’s focus on **Innovation, Value, and Service Since 1958**.

About Bon Tool Co.

Founded in 1958, Bon Tool Co. is a third-generation, family-owned manufacturer and distributor of professional construction tools and equipment. With thousands of products serving concrete, masonry, drywall, plaster, and general construction trades, Bon Tool is committed to delivering **Innovation, Value, and Service** to customers worldwide.
